Budget Message

By

GOVERNOR EARL WARREN

1949-1950 Budget

To the Senate and Assembly of the State Legislature of California:

In compliance with the provisions of the State Constitution and the needs of the State, I present herewith for your consideration the budget representing my estimate of expenditures to be made, and revenues required, by the State of California during the next fiscal year.

The total of this budget is \$1,060,187,939—an increase of \$140,244,652 over the budget which I submitted for the current fiscal year.

The total in the normal sense is actually \$912,278,995. The sum of \$147,908,944 budgeted for capital outlay will be paid out of moneys saved since 1943 for building purposes. It is not necessary, therefore, to consider this amount in connection with tax needs.

Tremendous as the budget total may be it will become evident that, exclusive of items for critically needed buildings under the program just mentioned, only \$233,638,000 in General Fund appropriations affecting taxes were in any sense subject to my control.

Analysis of the budget will reveal that it includes \$153,262,000 of increased expenditures for school and social welfare traceable to initiative measures approved by the voters during the past two years. As a matter of fact, one-third of this budget, or \$350,589,000, represents school apportionment and welfare programs required by constitutional provisions approved by the voters at the general elections in 1946 and 1948.

This budget reflects for the first time the action of the voters in approving Proposition No. 4 at the November 2, 1948, election. Proposition No. 4, in budget terms, means that \$88,767,000 has been added to our expenditures for old age and blind assistance next year. In addition the sum of \$29,468,000 is required to operate the program between January 1 and June 30 of this year. This means that, to the extent of \$29,468,000, balances that might have been used to finance requests in this budget will not be available. In total, the additional cost to the State of Proposition No. 4 will be \$118,235,000 up to July 1, 1950.

This is the budget of a State striving to service the needs of 10,350,000 people—a budget which must of necessity serve more people than heretofore and also reflect the increase in housekeeping cost now affecting every growing institution, both public and private.

Population increase has been a dominant influence behind the increased cost of government in California in the past six years. Growth continues as the principal factor in determining state expenditures. It is found in this budget translated into requests for more funds for education, state hospitals, prisons, public health, highways, the regulation of motor vehicles, and the construction of long needed buildings to house these important functions of State Government.

In terms of the total budget dollar, 30.2 cents will be expended for education; 20.0 cents will go for social welfare and public health; 19.4 cents for roads, streets, highways, and the regulation of motor vehicles; 8.9 cents for hospitals, correctional schools, and prisons; 5.1 cents for conservation and development of agriculture, water, and other natural resources; and 16.4 cents for all other state activities.

For some time we have believed that the State Budget might be more easily understood if it were presented in the three important units in which it naturally

divides itself. Therefore, this year we are showing separately the totals for State Operations, Capital Outlay and Local Assistance. It so happens this year that there has been a major transfer of obligations from Local Assistance to State Operations which is brought clearly into focus by this new method of budget presentation. The State Operations Budget has been sharply increased and the Local Assistance Budget has been decreased as a result of Proposition No. 4 which transferred all old age assistance and needy blind costs to the State.

The sections divide themselves as follows:

| | <i>Amount</i> |
|-----------------------------------|-----------------------|
| I. State Operations Budget----- | \$428,672,779 |
| II. Capital Outlay Budget----- | 241,122,553 |
| III. Local Assistance Budget----- | 390,392,607 |
| Total----- | <hr/> \$1,060,187,939 |

STATE OPERATIONS BUDGET

The budget for State Operations amounts to \$428,672,779. Excluding the amounts which must be provided as a result of voter liberalization of the social welfare program, the Operations Budget total amounts to \$262,367,000 as compared with \$234,821,000 for the current year—an increase of \$27,546,000. This increase is occasioned in the main by salary adjustments and the still increasing volume of service made necessary by our mounting population. We have made many improvements in the quality of state service during recent years, but I am making only moderate recommendations for such improvements this year in order to present as economical a budget as possible under the circumstances.

The increase in administration cost for the Social Welfare Department is not included in the \$27,546,000 but will be found included in the cost of Proposition No. 4, as mentioned above. A deficiency appropriation of \$3,075,323 is required to cover administrative cost of the State Department of Social Welfare until June 30, 1949, the end of the current fiscal year.

Salary Adjustments:

Pursuant to House Resolution No. 80 of the 1948 Legislature the State Personnel Board has made a detailed comparison of state salaries with those paid by private industries and other governmental agencies. It recommended a 5 percent adjustment, effective September 1, 1948, and has used available funds to provide such an increase for 18,000 employees in the lower salary brackets.

In order to extend the 5 percent increase to other classes where adjustments are due, the sum of \$1,800,000 should be made available immediately from the State General Fund to be paid on a retroactive basis to September 1st. I recommend a deficiency appropriation in this amount. There is included in the budget \$5,300,000 necessary to continue these increased salaries through 1949-1950.

You also have before you a report of the State Personnel Board and its recommendation for a special salary increase fund to be available in the event of a further general increase in salaries and wages in private business. I concur in this recommendation and have included a General Fund appropriation of \$5,600,000 for this purpose on condition that the fund shall be used only if and when studies of the Personnel Board show the necessity of further salary increases to maintain state salaries on a parallel with those in private industry. No legislative appropriation will be necessary for special fund agencies, since amounts can be made available by executive order, if salary increases are approved.

Other major increases which I am recommending in the State Operations Budget, and the reasons therefor, follow:

1. *Education:* Provision is made for the expenditure of \$48,171,321 for operation of state educational institutions, the Department of Education and other educational activities. (Apportionments to the Public School System which amount to \$196,250,900 are not included in this item.) This total contains an increase of \$7,561,422 over current operating expenses. Of this increase, \$5,519,296 is for the University of California. Explanation of the increase is found in items dealing with the amount and quality of education offered by the State. Some provision is made for larger teaching staffs in relation to enrollments and for an increase of courses available at both the University of California and the state colleges. A new law school and college of engineering at Los Angeles, extension of agricultural courses at Davis and the Fresno State College, and expansion of the agricultural research program contribute to the total. The largest single item of increase is \$1,000,000 required to offset student fees formerly paid by the Federal Veterans' Administration under the GI Bill of Rights.

2. *Mental Hygiene:* Provision is made for the expenditure of \$34,223,959 which represents an increase of \$1,366,390 over current expenditures. The increase is recommended in accordance with the needs of an additional 2,200 patients and to carry on a program to improve the standards of care provided for all persons in our mental institutions. The department is now in the third phase of a carefully worked out program designed to improve the ratio of medical and nursing personnel to patients. Until adequate facilities can be provided to house all of the 37,500 persons in our mental institutions and the 2,200 net increase anticipated each year, we must give extra supervisory attention to the conditions provoked by overcrowding. If we are to fulfill our responsibility to operate our institutions under an enlightened program, the improvement program now under way must be completed.

3. *Corrections:* Provision is made for the expenditure of \$15,207,460—an increase of \$638,669 over current expenditures. Factors to be considered in connection with the increase are the operation of additional facilities and an estimated 884 increase in the number of inmates. During the last two years we have followed a policy of replacing convict workers in our institutions with free personnel where confidential records or prison safety are involved. This program is carried to completion in this budget. It is recognized that a delicate balance exists between the direct economy of a liberal parole policy and the potential cost of releasing convicts not ready for, or incapable of, leading a normal free life. Additional emphasis is therefore being placed upon classification, education, and parole work with a view to returning as many prisoners as possible to self-supporting activities.

A sum of \$102,734 is included herein for the continuation of the work of the Crime Commissions and particularly the work of the Commission on Organized Crime. This is a substantial reduction from the \$214,341 in the current budget because most of the commissions will have completed their work and been discharged before the end of this fiscal year. The work already accomplished by the commissions, however, demonstrates that there is an active underworld in our State and that it is reaching out to organize and commercialize vice and crime.

The public, the Legislature, and the Governor are entitled to have the facts from the viewpoint of a citizens' survey made by people who represent a cross-section of our best citizenship. This is a difficult task for any group of citizens. Their efforts are bound to be impeded by the ramified influences of the underworld, but, as I said to you in my recent message to the Legislature, a failure to continue this work on the modest basis herein recommended would be a complete surrender to the underworld and an invitation to criminals everywhere to close ranks and prey upon our people in an organized manner. This is not law enforcement work. It is

not duplication. It is merely keeping ourselves properly advised before conditions become intolerable. The work has had the cooperation of the peace officers of the State and carries the endorsement of their association.

4. *Public Health*: Provision is made for the expenditure of \$4,826,858, an increase of \$1,025,585 over current expenditures.

State expenditures for health supervision have shown the largest increase of any governmental function during recent years—and properly so. This department was being allocated approximately \$750,000 a year when I took office as Governor six years ago. Believing that constant vigilance in matters of public health is of vital importance at all times, and particularly at a time when millions of new residents were crowding into our State, I first called for a reorganization of the department. Since that time I have consistently advocated a fuller recognition of state responsibility in this field.

One of the major increases in this budget is for health supervision in connection with problems of water supply and sanitation. State Government is charged with the responsibility of investigating and approving the domestic water systems, and facilities for the disposal of sewage, industrial waste, and other refuse. This budget will permit the State to discharge this responsibility in a more thorough manner than ever before. Other items involving increases are programs through which the state is extending additional assistance to the smaller counties in aiding crippled children and additional expenditures for the cerebral palsy program. Greater emphasis is placed upon the control of communicable diseases, especially research in connection with Q Fever, which constitutes a latent threat to health unless adequate control measures can be developed.

5. *Veterans Affairs*: Provision is made for the expenditure of \$4,769,101—an increase of \$383,655 over current expenditures.

Three-fourths of the increase recommended for this department relates to the program of educational assistance to veterans and veterans' dependents under legislation adopted in 1921. The act provides that veterans who desire to continue their education may receive an assistance grant, not to exceed \$1,000. This provision also applies to veterans of the second World War. As eligible students exhaust their rights under the federal education program an increasing number are turning to the State for assistance. The estimated cost of this program, including educational assistance to veterans' dependents, in 1949-50 is \$2,516,800. Other increases reflected in the department's budget are in connection with the operation of the Veterans' Home at expanded capacity and a moderate increase in state payments to service organizations for their work in connection with veterans' claims for care, preference or compensation.

6. *Motor Vehicles*: Provision is made for the expenditure of \$10,039,944 for normal operations—an increase of \$834,872. The budget also provides \$1,275,000 for purchase of materials and manufacture of license plates to be issued in 1951. This will occur but once in five years, in accordance with your approved five-year plan. This is the budget of a state department that, while working under the handicap of inadequate quarters, has been faced with a rising work load, the reorganization of its system to machine operation and the assumption of the entirely new financial responsibility program. Recognizing that this department leads all others in service contacts with the public, I am recommending expansions which will not only save time and expense for thousands of individual motorists, but which will compensate—through improved service—for the increased taxes now being paid by all motor vehicle owners. Included in this budget is a provision for the establishment of new branch offices of the department in a number of communities.

7. *Highway Patrol*: Provision is made for the expenditure of \$10,774,137—an increase of \$1,783,704. Explanation of the increase will be found in provisions made for 200 more highway patrolmen. This recommendation for the expansion of the Highway Patrol is in keeping with the program inaugurated two years ago. It is the second major increase which I have requested to bring our traffic regulation and safety activities more in line with the increases that have occurred in motor vehicle traffic. By the end of next year it is expected that 4, 500,000 vehicles will be traveling our streets and highways. In the last twelve months at least 3,000 deaths have occurred as a result of traffic accidents. This fact alone is convincing argument in support of expansion of the Patrol.

8. *Natural Resources*: Provision is made for the expenditure of \$18,010,634—an increase of \$1,105,386 over current expenditures. Conservation of natural resources has received increased recognition in recent state budgets. This budget provides for additional modern equipment to protect our foothill and brush areas from fire, for the further development of recreational areas, and for the expansion of the fish and game conservation program, pursuant to legislation adopted in 1947.

9. *Agriculture*: Provision is made for the expenditure of \$8,193,302—an increase of \$599,997. In the main the increase recommended for the Department of Agriculture is for the control and suppression of agricultural diseases and pests, and for the better dissemination of crop and market information.

10. *Industrial Relations*: Provision is made for the expenditure of \$4,030,470—an increase of \$213,157. The recommendations made in this budget provide for expansion of the Conciliation Service inaugurated as an experiment two years ago. Our experiences with this work have fully justified its continuation and enlargement. Funds for the Division of Industrial Safety are being increased to meet the added work load developing through industrial expansion.

CAPITAL OUTLAY BUDGET

Since 1943 it has been my responsibility to report at each legislative session on the condition of the physical plant of our State Government. I have endeavored to keep you currently and frankly informed on the problems and the needs of our educational institutions, prisons, hospitals and office buildings—neither minimizing nor exaggerating the extent of the accumulated obsolescence and depreciation of the last 20 years and the impact of population growth upon admittedly inadequate facilities.

This is the section of the budget in which we deal with the problem of the physical plant needs of State Government—needs which all of us realize are not static but are increasing day by day, both in urgency and in volume.

Because of war produced restrictions upon construction, this is the first time since I have been Governor that I have been able to report actual progress in the building of new facilities for state use. It is therefore time for a review of the steps we have taken in what I consider to be one of the most sound and humanitarian programs of expenditure ever undertaken by our State Government.

Working together during the past six years, we have fostered a program through which much of the long deferred construction and replacement needs of our State can be financed. We have called it our post war building program. It is the program through which we have shown our concern over the manner in which 37,500 mental casualties are housed. It is the program through which we have shown our recognition that 30,000 more students are seeking the educational

benefits of our university and state colleges than before the war. It is the program that reflects our concern over a prison situation created by 10,000 prisoners when permanent accommodations are adequate for only 5,300, and a trend that will necessitate the housing of 13,000 by 1955. It is the program to which we must look if hundreds of young boys and girls are to be kept out of jails or detention homes and afforded the retraining for good and useful citizenship offered by our Youth Authority.

In brief, it is to this program to which all of us have come to link our natural desire for enlightened and humane treatment for every person for whom the State must provide housing and direction. Likewise, we look to this program for relief from the drain upon tax moneys caused by the rental of buildings needed by State Government—an item which has grown to \$2,500,000 a year. It is a program designed to fill the void created by financial inability to build during a depression and necessary war-time restrictions against construction. It is a program for bringing the inadequate facilities of a State of 7,000,000 people into line with the needs of a State of 10,350,000 people.

It was in the year 1943, my first year as Governor, that we faced this tremendous problem of housing with resolution, and evolved the program which we are now carrying forward. It was a year of abnormal wartime revenue—a year in which we recognized that it would be possible to both reduce state taxes and develop a surplus for postwar construction use. We came to agreement on such a program. Taxes were reduced and the Building Fund was started. Our first step, under the building program, was to start the acquisition of sites for the new and expanded schools, office buildings, mental hospitals and correctional institutions which the program permitted us to envision.

The conclusion of the war made it possible to begin assigning accumulated funds to specific projects. In 1946 we developed, at an estimated cost of \$154,000,000, what has become known as the Unified Construction Program. We created a State Public Works Board, as a joint legislative-administrative body, to administer the program. It was our belief at that time that the Unified Construction Program then approved, plus appropriations already made, would permit the replacement of obsolete structures and provide the State with new facilities capable of meeting all normal requirements by 1951.

In 1947 I reported to you that steadily rising costs of construction and our continuing population growth had made the attainment of this 1951 goal impossible with the funds available. As a result of this report, you took action in your 1947 and 1948 sessions and earmarked first \$90,150,000 and then \$26,800,000 for use when the funds available for the Unified Construction Program had been exhausted.

Through this same period since 1943, you also made appropriations for specific construction projects not included in the original Unified Building Program. Among these projects were the medical and law schools on the Los Angeles campus of the University of California (\$8,000,000), a teaching hospital at the San Francisco Medical Center (\$6,000,000), the two new state colleges in Southern California and one in Sacramento (\$4,500,000), new wards at Napa State Hospital (\$1,326,000), a new building at Hastings College of Law (\$1,450,000), student housing at the state colleges and university (\$9,570,000), and the vocational and agricultural institution for young offenders at Tracy (\$3,165,000).

These specific appropriations—and there were more than fifty of them—were also supplemented to provide for increased construction costs. In the aggregate, with the supplementation, they now amount to \$141,259,000. In order to maintain

one consolidated construction program for the State, these projects were incorporated into the Unified Building Program in 1947 under the direction of the Public Works Board. This action gave us in fact, as well as in name, a Unified Building Program.

Thus, in total, during these years you have made available for construction use the sum of \$295,259,000 and earmarked \$116,950,000 as a reserve. These totals were not developed by guess or estimate, but through step-by-step approval of individual projects under a well-studied, long-term building program. Each dollar purpose, including use of the \$116,950,000 held in reserve has been given legislative screening and approval.

For the purpose of undertaking an analysis of this entire building program, it is helpful to break the program down into three broad classifications. The sum of \$102,963,000 has been appropriated under the general category of fixed available appropriations. The sum of \$192,296,000 has been appropriated under the general category of interchangeable available appropriations. The sum of \$116,950,000 is in the category known as "funds frozen in reserve." The current condition and availability of each of these funds is as follows:

Fixed Available Appropriations

| | |
|--------------------|---------------|
| Appropriated ----- | \$102,963,000 |
| Allocated ----- | 35,754,000 |
| | <hr/> |
| Balance ----- | \$67,209,000 |

History—The total appropriation in this category is for specific purposes and the funds are limited in their use to such purposes. Uses included are site purchase appropriations and the building projects to which I have just referred. Out of these funds commitments totaling \$35,754,000 have been made for projects now under construction, such as: the School of Veterinary Science and the Plant Science Building on the Davis campus of the University of California, three dormitories and other buildings at the Institution for Men at Chino, the library and other improvements at the California Polytechnical College, new ward buildings at Agnew, Camarillo, Napa, Norwalk, and Pacific Colony State Hospitals, and the new Business and Professions Building annex in Sacramento. In addition, sites have been purchased for a new state prison at Soledad and at Tracy, and a prison medical center at Vacaville; and for new buildings at San Jose, Humboldt, San Francisco and Fresno State Colleges.

We have in the active planning stage projects which will soon utilize a large portion of the \$67,209,000 balance now remaining in this special purpose fund.

Interchangeable Available Funds

| | |
|--------------------|---------------|
| Appropriated ----- | \$192,296,000 |
| Allocated ----- | 107,396,000 |
| | <hr/> |
| Balance ----- | \$84,900,000 |

History—In this category are the matters over which the Public Works Board has the greatest discretionary authority. It is made up of the original \$154,000,000 appropriation of 1946 and the 1947 and 1948 supplementations for increased buildings costs and additions.

The bulk of the projects making up this total were contained in the proposed capital outlay statements submitted to the Legislature in 1946 by the Director of Finance and approved at that time. This program includes projects in connection

with every institution in our state government. The Public Works Board has since approved construction expenditures amounting to \$107,396,000, leaving an available balance of \$84,900,000, which, at the rate plans are now being prepared, will be substantially committed before July of this year.

Funds Frozen in Reserve

History—This fund of \$116,950,000 is made up of the money set aside by the Legislature in 1947 and 1948. The enabling act under which it was set aside characterizes the fund in this manner: "To be expended for construction improvements and equipment for state agencies as may hereafter be authorized by the Legislature."

It is my recommendation that at this session you make this \$116,950,000 available for use during the coming fiscal year. Such action is required if the construction program contemplated at the time of its creation is to push forward without interruption. Unless such action is taken a slowdown in construction activities under our Unified Building Program will occur during the coming year. All necessary planning in connection with projects to be constructed out of the Fixed Available Appropriations and Interchangeable Available Funds will have been completed during this calendar year.

Looking at our construction program in its entirety we find that Public Works Board commitments to date total approximately \$143,000,000 out of the \$295,259,000 that it has had available for immediate use. In my opinion this is evidence of real progress. The board has only been able to undertake large scale construction during the last 18 months. Prior to that time the program was circumscribed by controls, shortages of materials and supplies, and by the inability to get satisfactory construction bids. Moreover, we were reluctant to compete with private contractors and home builders for material and manpower.

I have mentioned previously the manner in which steadily rising prices have brought about changes in our original concept of the cost of the Unified Building Program. I consider it unfortunate that most of the construction must be undertaken during a period of high costs. We are dealing with a problem of urgent need, however, and cannot afford to let other factors interfere. Increasing rental costs, outlays for temporary construction forced by crowded conditions, confusion and inefficiency caused by congestion, and widely scattered divisions in our major departments, all add to the expense of delay, and offset any savings that might accrue from waiting for construction costs to decline.

With the completion of the Unified Building Program, we will have eliminated the most glaring state building deficiencies. Since this phase of our construction program is now clearly defined, with the exception of making the funds frozen in reserve available, I wish to point out that we are still a growing state. Unless the needs of each year's growth are contained in each annual budget we will again find ourselves slipping behind even while we are correcting errors and omissions of the past. No budget is honest that does not contain the amount needed for normal replacement and expansion.

With this thought in mind, I am submitting for your consideration the new construction needs of seven divisions of State Government. In no case are these items included in the Unified Building Program. Each item has been carefully analyzed by the Department of Finance and represents a matter of urgency. The total request has been held to a minimum. The construction items recommended are as follows:

Department of Education----- \$6,610,000

To permit construction during the coming fiscal year of the partially financed priority building program of the state colleges; to expand the size of the basic campus facilities of San Francisco State College; to improve utilities at San Jose State College; to permit initial construction of the new four year college at Sacramento; and to purchase additional needed land at the Humboldt, San Diego and Chico State Colleges.

National Guard ----- \$6,050,000

To complete the state-wide permanent armory building program.

Department of Mental Hygiene----- \$402,000

To raise the height of Suttentfield Dam at the Sonoma State Home and to provide additions to the laundry building at the Norwalk State Hospital.

Department of Public Health----- \$160,000

To permit acquisition of the remaining parcels of land at the site of the departmental headquarters office building and laboratory in Berkeley.

Department of Natural Resources (Forestry)----- \$2,207,139

To construct six new forestry work camps to be operated jointly by the Department of Corrections and the Division of Forestry. These camps will afford additional protection against fire for our forests, and, at the same time, help relieve overcrowding at our prisons, and provide useful working opportunities for the prisoners.

Department of Corrections----- \$1,570,400

To provide a new administration building, sewage disposal plant, maintenance and shop building at San Quentin; maintenance shops, combination gymnasium-auditorium, and residences at Chino; additional improvements to the cell blocks and industrial buildings at Folsom.

Department of Finance----- \$6,645,000

To construct a new two-square-block state office building on the Capitol Mall; to provide additional office space in the Public Works Building Annex; to remodel completely State Office Building No. 1; and to acquire additional warehouse space, all in Sacramento; and to augment the appropriation for purchase of the State building site in San Diego.

LOCAL ASSISTANCE BUDGET

This is the section of the budget which lists all payments made by the State to local government agencies including cities, counties and school districts. The total is \$390,392,607, or almost 40 percent of the entire State Budget.

All costs in connection with old age and needy blind assistance programs formerly listed in this section as subventions to counties, have been transferred to the State Operations section of this budget as a result of voter approval of Proposition No. 4. This transfer coupled with the ending of certain emergency school subventions accounts for a decrease in subventions. Aid to partially self-supporting blind will continue under county administration. I recommend that payments to these blind people be increased immediately to \$85 per month, in accordance with the increase in the other assistance programs.

The major subventions accounted for in this budget are school support, \$208,615,000; payments in connection with social welfare and public health programs,

\$30,161,000; state subventions for flood control and local public works, \$35,280,000; and tax collections by the State for return to local governments, \$112,417,000.

Two items which have appeared in this section of the State Budget for the past two years will, I am sure, be discussed by you during the weeks to come. They are:

Child Care Centers—State government during the fiscal year has been supervising and providing financial assistance for 298 child care centers located largely in metropolitan areas. The enrollment has been almost 14,000 children and it is increasing. The cost to the State in the current year is estimated to be \$5,296,000.

In discussing this subject in my message to you one year ago, I said:

“I also believe the Legislature should determine the future of child care centers, which automatically expire on May 30th of this year. No new centers could be established since February 20th. These child care centers were established first by the Federal Government in wartime, but federal aid has long since been discontinued and they have since been maintained on a year-to-year basis. If they are not to be maintained beyond May 30, 1948, provision must be made for the care of many of these children in another manner.”

I am now repeating my comment of last year because there has been no change in the situation except that the life of child care centers has been extended one year. We still have no long-term policy in this matter. The current law provides that child care centers shall be closed on or before June 30, 1949. It is my belief that a better solution than this year-to-year consideration should be found. You have before you the findings of a recent interim committee on this subject.

School Building Aid—During the last two years the State has appropriated \$55,000,000 to aid financially distressed school districts in meeting their school building needs. These appropriations represented a distinct departure from the precedent that public school facilities should be provided by local districts. We went into this type of 100 percent grants-in-aid to help in an emergency and to give distressed local districts time to develop major long-range building programs. I advocated these emergency appropriations because I believed the grants to be a proper use for excess funds which we then had in our State Treasury. The days of surplus are ending. There is no surplus existent to recommend for such use at this session, and for this reason I suggest that the Legislature attack the problem in its entirety, recognizing that the principal responsibility for constructing school buildings is that of local government. The problem is one of such magnitude, however, that its solution is of fundamental importance to the welfare of all our people and calls for the cooperation of both State and local government.

REVENUE AND TAXATION

To finance this budget, adjustments in taxes are necessary. More revenue will be required than can be developed by present tax rates. Revenue receipts under current tax rates will produce only \$507,268,782 for the State General Fund during 1949-50. The General Fund expenditure requirements set forth in this budget total \$619,575,098.

The gap between proposed General Fund expenditures and revenues amounts to \$112,306,316. An anticipated June 30, 1949, surplus of \$27,335,857 will close this gap to \$84,970,459. This, then, is the amount which must be considered in relation to new tax revenues if we are to operate State Government with this budget in balance.

I have repeatedly expressed my objection to using any of our present state reserves to balance this budget. Such funds as we have available in this category are earmarked for specific purposes under a long-agreed-upon program. I have expressed the belief elsewhere in this message that the urgency of our building program is such that it will actually be cheaper to carry on this program in a period of high prices than to delay the program in anticipation of a distant day when prices may be lower. Once spent, these reserve funds will never again be available. Unless they are spent for the purposes for which they were earmarked and saved we will find ourselves struggling through another generation with inadequate facilities and will lack the finances with which to improve what is already a costly and deplorable situation.

I have likewise expressed my opposition many times to the diversion of funds now held in what we have come to call our "Rainy Day" fund. This fund was created for a specific and easily understood purpose during a period when surpluses were accumulating in our State Treasury. It was advocated as an emergency fund for use if and when state revenues suddenly declined. I am sure the purpose is understandable in every home in our State. It is the kind of a fund the head of every family strives to create—a fund that can be drawn upon when emergencies arise which cannot be met from normal income. It takes no argument to convince the average household that its modest "Rainy Day" fund cannot be looted to increase the standard of living without quickly being dissipated and the household being left without any cushion for emergencies. The same situation exists in State Government. We have managed to build up a "Rainy Day" fund amounting to \$75,000,000. It is a large amount of money, but it is not a great fund when we bear in mind that if our General Fund revenues were to shrink 15 percent, this fund would be eliminated in a single year.

I take the position that this fund should be held intact for a day of real emergency. It should not be used for day to day expenditures. When either the Legislature or the people increase the costs of government, revenues should be increased to pay for each new activity. To apply the "Rainy Day" fund to the increased costs of government this year would only delay for another year the balance which sound government requires between taxes and expenditures.

My first recommendation toward closing the gap between General Fund revenues and expenditures is that we terminate the temporary tax reductions and return to the 1943 tax levels in the sales, corporation and personal income tax fields, as provided under existing law. This would normally produce \$86,000,000 next year in additional General Fund revenue. However, only \$64,725,000 of this amount will be available for the financing of this budget, due to the lag between sales tax collections by our retailers and the actual receipt of the money into the State Treasury, and due to the fact that the corporation and personal income tax rates do not become collectible until January 1, 1950.

In 1943 we found we could maintain a balanced budget with lower sales, corporation and personal income tax rates. A reduction was made on a temporary basis and at each subsequent legislative session we have taken action to continue this reduction in force. In total, more than \$535,000,000 have been saved to the taxpayers of California by this program since 1943. Without legislative action this session the rates will return to their higher and permanent level. This will involve a return to the 3 percent retail sales and use tax, elimination of the 15 percent credit allowed under the bank and corporation franchise tax and corporate income tax, and a moderate increase in the personal income tax. The \$64,725,000 thus obtainable for General Fund use will reduce the gap between General Fund resources and proposed expenditures to \$20,245,459. This figure is basic in the consideration of new tax sources with which to balance this budget. There are

other considerations which require attention, however, if the budget is to be balanced in a sound and workable manner.

1. Included in the estimated General Fund resource total is \$27,335,857 of surplus which is not recurring and has no place in a long-range tax program.
2. The \$88,767,000 cost of Proposition No. 4, falling in the budget year, is not representative of the annual cost of the liberalized program when in full effect. The cost in 1950-51, the first full year of operation, is estimated at \$110,000,000 and an increased drain of \$21,233,000 on state revenues available for financing the next budget.
3. No provision is made for special appropriations which the Legislature may authorize in addition to the expenditures proposed in the budget.
4. Sound fiscal procedure requires a small margin of safety between tax income and expenditure requirements.

A survey of new or additional tax possibilities which could be used for sound and adequate budget financing points to three sources from which this amount could be obtained without hardship to any taxpayer group. They are:

1. An increase in the distilled spirits excise tax.
2. The imposition of a cigarette tax.
3. An increase in the license fees levied upon pari-mutuel betting at horse-racing meets.

All of these taxes rest upon luxury items which enjoy a comparative advantage under California tax laws. The present liquor excise tax of 80¢ per gallon is well below the \$1.42 national average. It can be raised to \$1.50 per gallon with complete equity. This adjustment would yield an additional \$11,600,000 to General Fund on an annual basis. But here again there will be a lag in collections which will make only \$9,150,000 available for financing this budget.

California is one of only 12 states which does not currently employ a cigarette or tobacco tax. A cigarette tax of 2¢ per package would produce at a normal rate of \$23,300,000 in a 12-month period, but collection methods permit us to count upon only \$18,000,000 during the period covered by this budget. With 36 states now levying either a cigarette or tobacco tax, California could well turn to this source for needed revenue.

The State is now granting monopoly preference in horse racing. Some of these enterprises, particularly the larger ones, are yielding fabulous returns for stockholders. A larger part of the excess profits could well be taken by the State in payment for the special privilege which it is granting. It is not unreasonable to look to this source for at least \$4,000,000 of additional revenue during the next fiscal year.

These three proposed adjustments would produce \$31,150,000 available for financing the budget I am herewith submitting.

Because \$29,468,000 of our surplus has been required to finance Proposition No. 4 for the remainder of this fiscal year, it would seem appropriate to finance that portion of the program out of this year's revenue. This could be largely accomplished by restoration of the 3 percent sales tax and by making provision for the liquor and cigarette taxes herein mentioned to start as of April 1, 1949, rather than July 1st. The sales tax would thus produce \$14,400,000 additional and the latter an aggregate of \$8,000,000. Under existing law, the tax restoration on corporate earnings and personal incomes becomes effective for the entire year 1949, payable in 1950.

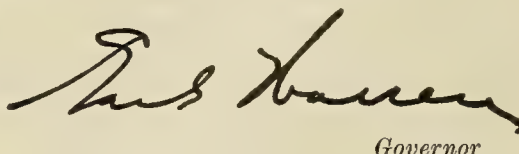

I am opposed to the use of the ad valorem tax to make up either the amount needed to balance this budget or to develop revenues to finance any special appropriations which may be enacted during this session.

Large as this budget is in total, it is a budget of necessities determined by acts of the Legislature and by measures initiated by the people. It contains no frills, innovations, or extravagances. It is within both the spirit and the letter of the law. The revenues recommended should keep us in balance with a few million dollars for a cushion. But these revenues will not permit of any great amount of special appropriations. It will take a maximum of self-restraint to keep within our financial means, particularly in view of the fact that the Legislature has already taken preliminary steps to establish new state colleges in Los Angeles and new campuses of the University at Santa Barbara and Riverside. If new provisions are made for these institutions, there will be little or no money left for any other special appropriations, if the budget is to remain in balance.

The only other sound alternative, if there are to be additional appropriations, would be to increase the revenues by additional taxation.

It is not possible to deal with all matters in detail in this message, but I am confident that as your committees engage in the study of the detail of the entire budget you will find an honest and fair presentation of facts. The Department of Finance and the representatives of all state departments stand ready to discuss the detail herein contained and to cooperate in the development of additional facts.

The State Government is a large institution. It serves the people in many ways. It has grown in response to the demands of the people for more and better services and in keeping with the needs of our greatly increased population. Often the people themselves initiate the legislation for these new or expanded services. We have tried to keep the scope of its activities within the bounds of sound organization. But we must recognize that the growth has been rapid and that some of the activities, have of necessity, been established through the years in accordance with the principles of trial and error. In such circumstances, a complete inventory of our situation might be in order. It would not be beyond the realm of probability that both our tables of organization and some of the methods used might be subject to considerable improvement that would save money for our taxpayers, and that a study of the entire governmental structure and our relations with all levels of government might accomplish such a result. If the Legislature is of the opinion that a commission of governmental experts and private citizens could do such a job for the benefit of our State, I would be happy to cooperate in such a program.

Governor

JANUARY 21, 1949

Letter of Transmittal

HONORABLE EARL WARREN, *Governor of California*

State Capitol, Sacramento, California

DEAR GOVERNOR WARREN: Transmitted herewith are the summary schedules and detailed statements of your budget for the State of California covering the fiscal year which begins July 1, 1949, and ends June 30, 1950.

In accordance with your instructions, greater effort has been made to study the organization and operation of all state agencies. Expenditure recommendations have been more closely related to the current and projected workloads in each service provided by the State. Rapid progress has been made during recent years in filling service deficiencies. Therefore, provision for improvement in standards of service contained in this budget are more moderate than in your previous budgets.

Transfer of the aged and blind aid programs to state operation on January 1, 1949, will make it necessary to reorganize the State Department of Social Welfare, provide greatly expanded staffs for both that department and the State Controller, and formulate many new administrative procedures. On your instructions, the Department of Finance has taken leadership in this work and, in cooperation with Department of Social Welfare and the State Controller, is making every effort to devise workable operating methods and efficient organization plans. The expenditures recommended in this budget for these two agencies reflect the preliminary conclusions of our joint studies, and are subject to modification as more intensified consideration is given to the complex problems involved.

Another major reorganization study conducted by the Department of Finance during recent months related to the coordination of communication facilities operated by the State. Eight state agencies now utilize radio communication systems. There is great opportunity both for economy and improved efficiency in the unification of these systems into modern, centralized radio communication facilities. The more urgent recommendations for improved facilities have been included in the budgets of the several operating agencies and provision has been made for staffing the Communications Division in the Department of Finance for centralized supervision of engineering and maintenance. I am hopeful that important steps may be taken in the coming year toward the achievement of this project.

As a means of obtaining valuable war surplus property for state use, a small, temporary unit was created in the Department of Finance separate and apart from the central purchasing division. Work of this section will be completed by the end of this fiscal year and it will then be liquidated. Property with a "fair" value of \$17,921,896 has been purchased for the sum of \$3,352,396. The direct saving to the State has been \$14,569,500. In addition, the State has obtained items which in many instances were unobtainable in regular trade channels. Operating expenses will be about \$162,000 for the four-year period ending June 30, 1949. Although this service unit was not organized to operate at a profit, it will return not only its original \$100,000 revolving fund, but will show an estimated surplus of \$18,000. It is indeed gratifying to report this record of achievement.

In the past, I have taken this opportunity to report upon the emergency funds placed under my stewardship. In approving the 1948 Budget Act, the Legislature provided \$12,000,000 to cover contingencies and emergencies which might arise in the current fiscal year. Of this total, the \$5,000,000 Flood Control Fund remains intact and will be carried forward to the new budget. An appropriation of \$1,500,000 was made to meet salary costs in connection with conversion to the 40-hour

week. The sum of \$204,697 was used for this purpose and \$1,295,303 will revert to the General Fund at the close of this year. The Salary Increase Fund of \$2,000,000 has been completely allotted in providing an approximate 5 percent adjustment for employees in the lower salary ranges whose salaries were found by the Personnel Board to be out of line with those paid in other public and private employment. A deficiency appropriation of \$1,800,000 will be required to extend this adjustment to other salaries shown by Personnel Board studies to be below prevailing rates of pay. A total of \$1,316,875 has been allocated to date from the \$2,000,000 appropriation for contingent increases in commodity prices and institutional populations, principally because of somewhat higher food and clothing prices and slightly greater mental hospital populations than were anticipated in the current year's budget. Approximately two-thirds of the normal emergency fund of \$1,500,000 has been allotted to meet unforeseen contingencies. The balance is in reserve for any additional emergencies which may occur during the last half of the fiscal year. Detailed statements of operations affecting these funds are shown in the budget.

Your attention is called to several improvements in the scope and arrangement of the budget. First, the budget has been segregated into three parts, the State Operations Budget, the Capital Outlay Budget, and the Local Assistance Budget, in order to permit the Legislature and the public to more clearly distinguish between the three major programs to which state funds are applied. Second, a section has been added to each agency's detailed budget setting forth the salient facts as to appropriations available, expenditures therefrom and unexpended balances. Third, the appropriations proposed for the budget year have been summarized. Fourth, a summary statement of fixed charges has been revised to segregate constitutional from statutory fixed charges and to enable a comparison of fixed charges with controllable expenditures.

Efficient fiscal operation of State Government depends upon the work of several hundred people. It would be impossible here to acknowledge my debt to all who have cooperated with me. However, I should like to pay special tribute to members of the Public Works Board who have been unflagging in their efforts to make the State's capital outlay program successful. Members of the board who have retired from state service deserve particular mention at this time. The Legislative Auditor has been extremely helpful with respect to the building program and budget details. My thanks go to him, his staff, the officers and employees in other state departments, and to my own staff, without whose technical knowledge and untiring work preparation of this State Budget would have been all but impossible.

Again may I offer the services of this department to you and to members of the Legislature in obtaining any additional information which may be essential to a careful consideration of this budget.

Respectfully yours,

A handwritten signature in dark ink, appearing to read "James E. Moran". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.

Director of Finance

^a Including corporation income tax.^b Including California Polytechnic College and California Maritime Academy.

Estimated State Revenues, 1949-50

State tax receipts, with few exceptions, are measured by the volume of business transactions in California and the net income derived therefrom. On the average, state revenues flow into the Treasury approximately six months after the taxable transactions occur. Therefore, revenues during the 1949-50 Fiscal Year will be determined by the course of business conditions during the calendar year 1949. The estimates presented in this budget were prepared during a period of business uncertainty. Considering only apparent weaknesses in the economic outlook, it would be possible to forecast a substantial decline in state revenues. A carefully reasoned forecast, however, must also consider the elements of strength in the current outlook. Care has been taken to present such a reasoned forecast in the estimates herewith submitted.

Revenue receipts totaling \$858,193,707 are anticipated during the 1949-50 Fiscal Year. This sum includes \$793,468,707 estimated from present state taxes and tax rates, and \$64,725,000 to be derived by the automatic expiration of temporary tax reductions in effect since 1943.¹ The estimate does not include the additional revenue to be obtained by recommended budget balancing adjustments in the distilled spirits excise tax, horseracing pari-mutuel fees, and the enactment of a cigarette or tobacco tax. The \$793,468,707 estimated for the next fiscal year from present taxes and tax rates may be compared with \$794,393,448 expected during 1948-49 and \$722,718,609 received in the period from July 1, 1947, to June 30, 1948.

Receipts to the State General Fund during the coming fiscal year are estimated at \$571,993,782, compared to \$514,031,621 in the current year and \$471,696,706 in 1947-48. Adjusting to a comparable basis by eliminating the \$64,725,000 additional revenue due to rescinding the temporary provision of the sales, franchise, and income taxes, shows a total of \$507,268,782 in the ensuing year, or \$6,762,839 less than the total anticipated for 1948-49.

Receipts to special funds and reserves during 1949-50 are estimated to reach \$286,199,925, compared to \$280,361,827 in the current year and \$251,021,903 in 1947-48. Further increase in the number of motor vehicles in operation and a moderately larger volume of gasoline consumption account for virtually the entire gain in the special fund receipts.

Subventions from the Federal Government are expected to reach \$163,687,432 next year, against \$114,311,459 in 1948-49 and \$112,147,722 during 1947-48. Larger contributions under the social security program and highway aid make up most of the increase in this total. Receipts from the Federal Government are not included in the budget revenue totals given above.

¹ Under provisions of Chapter 12, Statutes of 1948, the retail sales and use tax rates will return to 3 percent July 1, 1949; the 15 percent credit allowed under the bank and corporation franchise and corporation income taxes will be eliminated January 1, 1950; personal income tax exemptions will be lowered from \$3,000 (single) and \$4,500 (married or head of family) to \$2,000 and \$3,500 and the rate on taxable incomes between \$5,000 and \$30,000 will be increased 1 percent, effective January 1, 1950.

Economic Activity

Since the end of World War II, California has experienced a mounting wave of prosperity. An average of 4,088,000 persons were employed during the calendar year 1948. This represents a gain of almost 10 percent over the average for 1945. The aggregate income of California residents is estimated at 17.5 billion dollars for the year just closed—up more than 28 percent over the 1945 total. Taxable retail sales totaled approximately 11.5 billion dollars, against 6.5 billion dollars only three years ago. Corporate incomes taxable by the State are estimated at 2.1 billion dollars for 1948, in comparison with 1.4 billion dollars in 1945. Similar increases could be given for other phases of economic activity, and the gains recorded here have their counterparts in national data.

A number of factors have combined to cause this period of prosperity. During the war period many normal needs went unfilled while the Nation's production was directed into military channels. Increased purchasing power and competition among consumers to satisfy these deferred needs have been important elements in the intense economic pace of the last three years. Impetus was added by the necessity for replenishing inventories—not only those held for processing and sale, but the needs of industry and the personal or household supplies of several million consumer units as well. Assistance to countries either devastated or dislocated by the war has added to the pressure upon the domestic market. Inflation, resulting from deficit financing during the war, has increased both the dollar cost of meeting needs and the volume of income available for expenditure.

Outlook for 1949

While differences of opinion exist regarding the outlook for business in 1949, the range of these differences is not wide. Few economists foresee a continuation of the rapid inflation which has characterized much of the postwar period to date. Few of those who foresee a sharp readjustment following the postwar prosperity anticipate a great decline during 1949. The weight of opinion almost certainly would fall between the indefinite limits of moderate improvement and moderate decline.

Among the factors counted upon to sustain economic activity in 1949 are, first, the need for large defense expenditures. International friction, which must be listed among current uncertainties, will necessitate large outlays for the equipment and maintenance of the military establishment. Minimum appropriations for this purpose in 1949-50 are estimated at 15 billion dollars—up one-fourth from the current year's total. Expansion of the armanent program will have particular effect upon aircraft production in California.

A second factor of strength is the continued participation by this country in the European Recovery Program. Although the total expenditure authorization for this purpose may not exceed the 1948-49 total, empha-

sis will be upon industrial products and machinery rather than foodstuffs and clothing. This shift in demand will bring additional pressure upon items likely to be in short supply in the domestic market.

As a result of higher expenditures for defense, the outgo of the Federal Government will be more nearly in balance with income during the next fiscal year. Budget figures indicate that fiscal operations of the Federal Government during 1949-50 will take approximately 1.5 billion dollars more money out of the economic structure through taxes and other charges than will be put back in the form of government payments. Corresponding amounts for 1948-49 and 1947-48 are 2.8 and 8.8 billion dollars, respectively. Thus, although federal operations will continue to exercise a deflationary influence, this factor will be less important than during the two previous fiscal years.

Motor vehicle production since the war has not yet filled the accumulated replacement need. Although the effective demand for new cars may have been reduced or further postponed by high prices, there is strong likelihood vehicle production will be fully as large in 1949 as in 1948. A similar situation is registered in the building industry. While progress has been made in filling the need for private residential building and some decline in the volume of residential construction is anticipated for 1949, the potential demand is still great. Utility expansion will continue at current levels, and public construction is expected to increase under the enlarged program of school, hospital, and office building, and other public works. Forecasts of total building activity in 1949 indicate a dollar volume slightly above the 18 billion dollar total recorded in 1948. With rearmament, motor vehicle production, and building all active, steel output should continue near capacity, thus providing another factor of strength in the current outlook.

Holdings of liquid assets by individuals in the form of money, bank deposits, and securities still remain near the wartime peak. The distribution of these resources may not be as widespread among the total population as it was at one time, but a continued increase in Series E savings bonds outstanding indicates that savings remain an important potential resource of many families. Spendable funds will be further augmented by the refinancing of national service life insurance. Although recomputation of war-risk insurance may not be completed until late in the year, a partial refunding of premiums will place substantial payments in the hands of many veterans.

To this list of favorable elements in the outlook there can be added factors which contribute strength in that they will tend to prevent an extreme readjustment or immediate depression. These include parity payments for a wide variety of farm crops, unemployment insurance and other social security benefits, and insurance on bank deposits. A cautious inventory policy and credit controls are other factors of relative strength. The ratio of inventories to sales in manufacturing and trade industries near the close of 1948 was below that of prewar years. Apparently speculation in inventory values has not been great, and losses from this source would be light in a moderate business reversal. Similarly, credit controls have been instituted before the volume of obligations became out-of-line with income, as judged by prewar experience. Credit losses in a business reversal would therefore be minimized.

The question of further wage and salary increases must be listed in the borderland between favorable and unfavorable business factors. In the last three years, wage increases undoubtedly have contributed to the volume of state revenue by expanding the aggregate purchasing power. At some point, however, wage increases may become deflationary. If production costs are raised by successive wage increases and selling prices go beyond the reach of a substantial segment of the people, a deflationary adjustment will be likely. Whether this cumulative effect will result at the next step in the current wage-price spiral is a question which cannot now be answered.

Against this list of strong or sustaining influences in the current business outlook, it is possible to show a number of potential weaknesses. In rebuilding inventories and assisting other nations, this country produced a greater volume of goods than was purchased for domestic consumption. As deferred needs are satisfied, inventories are accumulated, and other nations become capable of meeting a greater part of their needs, adjustments in economic activity seem inevitable. Production must be coordinated with the volume of goods removed from distribution channels. The required adjustments have already taken place in some industries and will be made in others as supply and demand are brought into balance.

A record volume of farm production has resulted in price declines for grains, fruits, and vegetables. Cotton during recent months has been selling well below the quotations of a year ago. Although expansion of meat supplies and dairy production depends upon an increase in the number of livestock on farms, prices have already shown substantial declines. In general, it appears the peak of farm prosperity has passed. The parity program will curb further price reductions in many basic farm crops, but maintenance of present price levels will mean a material drop in farm income compared to recent years.

Adjustments have also appeared in other lines of production and trade. The textile industry, for example, has experienced periods of curtailment and renewed production fairly typical of prewar years. Price drops have been reported in several apparel lines, and general uncertainty has prevailed while the market is being tested for a new balance between production and consumption. Similar situations exist with respect to shoes, household appliances, furniture, and radios.

From the viewpoint of state revenues, return of a buyers' market is an unfavorable development. Maintenance of sales volume—and tax yield—will be more uncertain. Selling expenses will be increased, with a possible reduction in the taxable income arising from business operations.

Assumptions

In appraising the probable trend of economic conditions, the favorable factors have been set against the unfavorable. Largely on the basis of judgment, confirmed by what appears to be the prevailing opinion of others who have made statements on this subject, assumptions regarding fundamental economic factors in 1949 has been formulated. These assumptions underlie all of the revenue forecasts for the 1949-50 Fiscal Year.

(1) *Economic Activity.* It has been assumed that business activity will average as high in 1949 as in 1948, but a moderate downward trend from the level attained in the fall of 1948 will characterize the new year. It is assumed this trend will result largely from adjustments in nondurable goods industries and that durable lines, in general, will remain at capacity levels.

(2) *Income of Individuals.* The income of California residents amounted to 16.1 billion dollars in 1947, according to estimates of the United States Department of Commerce. Judging from available data, the corresponding figure for 1948 was 17.5 billion dollars and the annual rate for the fourth quarter of that year was probably 18.0 billion dollars or more. A downward trend from this peak rate has been assumed for 1949, with a total of 17.5 billion dollars for the year as a whole. This change is the result of two subordinate assumptions: First, that salary and wage payments during the year as a whole will be 5 percent above 1948, and second, that income from property will be down 15 percent due to a decrease in farm income and smaller business profits as increasing costs meet competitive selling conditions. No change in Federal income tax rate has been assumed. On this basis, spendable income remaining after payment of federal and state income taxes has been estimated at 15.6 billion dollars in 1949. Under the assumptions used, there will be no net change in savings in 1949. However, allowance has been made for a further expansion in short-term consumer credit amounting to 200 million dollars during the year. This represents approximately 70 percent of the apparent credit expansion in 1948 and 66 percent of the increase indicated during 1947. Spendable resources in the form of current income and short-term credit are estimated at 15.8 billion dollars for 1949, compared with 15.7 billion dollars in 1948, and 14.2 billion dollars in 1947.

(3) *Price Levels.* Although a varying pattern of price changes has been used in some instances, it has been assumed the price of food and other nondurable items will decline, while prices of metal products will increase. It is unlikely corporate profits during the year will reflect inventory appreciation, as in the past.

(4) *Population.* The United States Census Bureau has estimated California's population as 10,031,000 on July 1, 1948. It has been assumed the State's population will continue to grow, due to the excess of births over deaths and to migration. The estimate for July 1, 1949, is 10,250,000 and for July 1, 1950, is 10,450,000.

General Fund Taxes

The pattern of economic conditions indicated above would produce the \$571,994,000 in revenue estimated for the General Fund during 1949-50. Since the three leading General Fund taxes—those on retail sales, corporation franchise, and personal incomes—are most directly geared to business activity, any material deviation from this pattern would affect General Fund receipts materially. If, for example, individual incomes were to decline 15 percent during 1949, State receipts to the General Fund would drop to approximately \$526,000,000. If income payments to the people of California were to increase 5 percent, State General Fund receipts would advance to approximately \$620,000,000. This variation of about \$50,000,000 on either side of the \$572,000,000 budget estimate indicates the minimum

and maximum which might be anticipated within the limits of any reasonable change from present conditions.

In the span of five years following 1942, total receipts advanced from \$279,322,000 to \$471,697,000, and under the estimates here presented are expected to reach \$514,032,000 in the current fiscal year. Large as this growth is, it does not fully reflect the productivity of present State taxes under prosperous economic conditions. Tax rate revisions and the diversion of funds to other purposes have reduced the volume of General Fund revenue in recent years from the total which would have resulted had the laws remained unchanged. The retail sales, franchise, and personal income taxes were reduced in 1943 and the personal income tax was further adjusted in 1945. Under legislation adopted in 1947, the State's 50 percent share of liquor license fees and 20 percent share of motor vehicle "in lieu tax" receipts were relinquished to cities and counties. In the same year motor vehicle transportations tax revenues formerly credited to the General Fund were diverted to highway uses and \$3,000,000 of horse racing fees were earmarked for wild life conservation. If these successive tax reductions and diversions had not been made, General Fund income in the current year would have reached \$657,000,000, or \$143,000,000 more than is anticipated in the estimates presented here.

A summary of General Fund revenues and related economic data is shown on page A-11. Amounts shown for 1949-50 include anticipated receipts as a result of return to the higher levels of tax on retail sales, corporate earnings, and personal income. They do not include possible revenues from a tobacco or cigarette tax or additional receipts which would result from an increase in the liquor excise tax or horse racing license fees.

State General Fund revenues have increased more rapidly than population. During the five years from 1936 through 1941, per capita receipts to the General Fund averaged \$26.16 per year. From this level there was an almost continuous increase to the \$50.69 indicated for 1948-49. Under the estimates presented in this budget, per capita General Fund receipts in 1949-50 will advance to \$55.26,² due entirely to elimination of the temporary tax reductions.

During the war an unusually large part of the aggregate personal income went into federal bonds and other types of savings. These funds did not flow in channels which are subject to normal state taxes. Since the war there has been an appreciable expansion in consumer credit and this, as well as current income, has generated state revenues. During the five prewar years, General Fund revenues amounted to \$3.67 per \$100 of estimated expenditures. In the war years this ratio advanced to an average of \$3.91 per \$100 of expenditures, due largely to abnormally high sales tax payments by industrial establishments and by individuals temporarily in the State whose incomes cannot properly be attributed to economic activity in California. Since 1945-46 this ratio has averaged \$3.39 in state taxes per \$100 of consumer expenditures, and is estimated to be \$3.61 in 1949-50, due chiefly to increased tax rates.

The estimate of retail sales and use tax collections during 1949-50 is based upon the relationship between

² This per capita figure and the ratio of taxes to spendings do not include revenues from a tobacco or cigarette tax or higher rates on distilled spirits and horseracing licenses.

taxable sales and total expenditures by the people of California during each of the last 12 years. On the basis of this established relationship and with spendable resources of \$15,825,000,000 assumed for 1949, taxable sales are estimated at \$11,602,000,000.³ Although the sales and use tax rate will increase to 3 percent July 1, 1949, under the Governor's tax recommendations, collections during the July-September quarter will represent chiefly taxes collected on sales made during the previous three months at the 2½ percent rate. Allowing for this lag and for the fact that assessments made under the State's audit program will also relate primarily to the 2½ percent rate, sales tax revenue during 1949-50 has been estimated at \$336,100,000. Of this amount, \$44,100,000 is attributable to the increase in tax rate. Receipts during 1948-49 are estimated at \$296,800,000, and actual collections in 1947-48 were \$275,566,000.

Bank and corporation franchise tax receipts during 1949 will depend primarily on 1948 net business earnings.⁴ In estimating this year's collections, comparative data on taxable earnings in 1947 and 1948 were obtained from 280 corporations accounting for roughly 36 percent of the tax. This sample was classified into broad industry groups and the percentage changes for each group were applied to appropriate segments of the franchise tax base. Although wide differences in the earnings of various industries are indicated, the aggregate franchise tax collections during 1949 should increase 10.1 percent over the total for 1948.

Franchise tax collections during 1950 will depend upon business earnings in 1949. During recent years increasing inventory values has been a factor in the volume of taxable corporate earnings. Under the assumption that prices in general will not rise appreciably in 1949, this factor of increased earnings will not be reflected into 1950 tax receipts. Consequently, the estimated tax base has been reduced 10 percent for this factor. A total of \$82,125,000 has been estimated as revenue from the bank and corporation franchise tax and the corporation income tax during 1949-50. Elimination of the 15 percent temporary credit on tax liability accruing between January 1, and June 30, 1950, accounts for \$6,955,000 of this total. Estimated receipts from these two sources during 1948-49 amount to \$76,325,000, while actual revenues in 1947-48 totaled \$69,182,000.

In forecasting personal income tax assessments during the current and ensuing fiscal years, the estimate of total income received by California residents has been divided into two parts, first, that derived from salaries and wages, and second, that derived from the owner-

ship of property. Tax payments on incomes of less than \$10,000 per year have been estimated on the basis of projected salary and wage incomes. Taxes assessed on incomes of \$10,000 per year or more have been estimated on the basis of anticipated income arising from the ownership of property. The two segments have been combined in the final totals.

This method of estimating personal income tax receipts is new and has been developed in an effort to overcome weaknesses in the method previously used. It is believed salary and wage income will increase moderately during 1949, but property and proprietorship income will decline, due largely to a reduction in net farm income and the net earnings of small businesses. Thus, although personal income tax receipts based upon salaries and wages may advance somewhat, the tax on property income accruing primarily in the higher brackets and subject to higher tax rates, will decline. Receipts from the personal income tax during 1949-50 are estimated at \$64,200,000, of which \$13,670,000 will accrue as a result of terminating the present temporary exemptions and tax rates, effective January 1, 1950. Revenues in the current year are expected to total \$52,500,000. Actual receipts from the personal income tax were \$50,185,000 during the 1947-48 Fiscal Year.

Insurance gross premiums tax assessments during the current fiscal year are based upon business written in 1947 and are specifically known in amount. Collections during 1949-50 will depend upon premium receipts of insurance companies in 1948 and have been estimated upon the basis of reports from 104 major companies. The coverage effected in this sample varies from 50 percent in the case of fire insurance to 77 percent for life insurance. While some variation can be expected between actual collections and the forecast for this tax, the margin of difference should be small. A total of \$22,400,000 has been estimated for 1949-50, compared to \$20,345,000 in the current year and \$17,304,000 in 1947-48.

Apparent consumption of alcoholic beverages has remained relatively stable during the last two years. Distilled spirits consumed per capita of adult population amounted to 2.47 gallons in 1947 and roughly 2.40 gallons in 1948. Consumption for 1949 has been estimated at 2.45 gallons per adult. Receipts from this source totaled \$12,399,000 last fiscal year. Revenue collections of \$13,250,000 are anticipated for the current period, and \$13,630,000 is forecast for 1949-50. Beer and wine excise taxes returned \$3,474,000 to the State Treasury in 1947-48, and are expected to yield \$3,620,000 in the current year. The total estimated from these levies in 1949-50 is \$3,740,000.

Inheritance tax receipts cannot be estimated by any objective method. They depend almost entirely upon the number, size, and disposition of estates, and the period required for final settlement. General Fund income from this source totaled \$19,400,000 in 1947-48. Although collections are currently running slightly behind last year, the difference is not great and a total of \$20,000,000 is estimated for the year as a whole. Settlement of several large estates may be completed in 1949-50, and the sum for that year has been increased arbitrarily to \$22,000,000. Gift tax receipts may be expected to continue at approximately \$1,000,000 per year.

³ The correlation between taxable sales and estimated expenditures during this period is expressed by the formula: taxable sales equal (.79 times expenditures) minus \$900,000,000. The average deviation between actual sales and sales computed under this formula during the last 12 years is \$258,000,000, or approximately \$7,740,000 in tax at the 3 percent rate. The net deviation, offsetting overages against underages, is —\$22,000,000, or the tax equivalent of \$666,000 per year.

⁴ Since most economic data are reported for a calendar year, it is more convenient to estimate state tax receipts on that basis also. In preparing the budget revenue forecasts, calendar year collections are converted to fiscal year collections in accordance with experience during the last decade. For example, personal income tax collections during 1949 will be based almost entirely upon the income of California residents during 1948. Approximately 80 percent of the total should be received before July 1, 1949, and will fall into the 1948-49 Fiscal Year; 20 percent should come in after July 1, 1949, and will fall into the 1949-50 Fiscal Year. Adjustments of this nature and allowance for collections under the State's audit program are necessary in connection with a majority of state taxes, but for the sake of brevity are not detailed in this summary description of revenue estimates.

Special Fund Revenues

Motor vehicle taxes and fees account for 84 percent of the \$286,199,925 special fund revenues estimated for 1949-50. Basically, receipts from these levies are not likely to be greatly affected by either an improvement or a deterioration in business conditions.

Fee paid motor vehicle registrations during 1948 are estimated at 4,190,000 units, compared to 3,879,000 in 1947. This total is expected to reach 4,450,000 in 1949 and 4,675,000 in 1950, judging from current trends. It must be emphasized, however, that a change from manual to machine methods of handling motor vehicle registrations has temporarily affected registration figures, and some deviation from these estimates may be shown when actual data become available.

Motor vehicle registration and weight fees during 1947-48 totaled \$32,554,000. Due to an unavoidable delay in handling license remittances in the early months of 1948, this total was unusually low. Approximately \$7,000,000, which normally would have been cleared during the last fiscal year, fell into the 1948-49 period. The current year total of \$50,926,000 is therefore abnormally large by approximately the same amount. Adjustment of the actual and estimated receipts to a normal revenue flow would indicate \$39,500,000 for 1947-48, approximately \$43,900,000 for 1948-49, and \$46,200,000 in 1949-50. The latter figure is not affected by this

unusual situation and is the amount shown in the budget revenue tabulations.

Motor vehicle license fee (in lieu tax) receipts totaled \$42,208,000 in 1947-48 and are estimated at \$35,912,000 for the current year. In addition to the delay in reporting, mentioned above, these amounts are not strictly comparable due to a change in the basis of valuation and the tax rate (Chap. 26 :Stats. 1948). The estimate of revenue from this source in 1949-50, when the 1948 revision will be fully operative, is \$42,952,000.

Gasoline consumption per registered vehicle during the last two years has gradually fallen below the immediate postwar peak. Allowance for continuation of this trend has been made in estimating future fuel consumption. A total of \$132,750,000 is forecast for 1949-50, against \$127,800,000 estimated for the current year, and \$116,823,000 in 1947-48. A part of the difference between the two latter totals is due to the increase in tax rate from 3 cents to 4½ cents per gallon. This advance was not fully reflected in collection figures covering the 1947-48 Fiscal Year.

Receipts from the motor vehicle transportation tax in the three years covered by the budget are substantially below the amounts reported in other recent years. This decline is due entirely to the credit offset, amounting to approximately one-third of all vehicle weight fees paid by motor vehicle transportation companies, allowed in legislation adopted in 1947.

STATE GENERAL FUND REVENUES IN RELATION TO POPULATION, INCOME RECEIVED BY INDIVIDUALS, AND CONSUMER EXPENDITURES

| Year | Estimated population Dec. 31st | Total income of individuals (in millions) | Estimated consumer expenditures (in millions) | State fiscal year | General Fund revenues | Revenues per capita | Revenues per \$100 of individual income | Revenues per \$100 of consumer expenditures |
|-----------|--------------------------------|---|---|-------------------|-----------------------|---------------------|---|---|
| 1936---- | 6,434,000 | \$4,730 | \$4,624 | 1936-37 | \$159,722,000 | \$24.82 | \$3.38 | \$3.45 |
| 1937---- | 6,592,000 | 5,047 | 4,891 | 1937-38 | 176,953,000 | 26.84 | 3.51 | 3.62 |
| 1938---- | 6,720,000 | 4,772 | 4,570 | 1938-39 | 170,816,000 | 25.42 | 3.58 | 3.74 |

| 1946---- | 9,642,000 | 15,164 | 12,805 | 1946-47 | 447,288,000 | 46.39 | 3.02 | 3.59 |
| 1947---- | 9,922,000 | 16,121 | 14,177 | 1947-48 | 471,697,000 | 47.54 | 2.92 | 3.33 |
| 1948---- | 10,140,000 | 17,459 | 15,735 | 1948-49 | 514,032,000 | 50.69 | 2.94 | 3.27 |
| 1949---- | 10,350,000 | 17,500 | 15,825 | 1949-50 | 571,994,000 | 55.26 | 3.27 | 3.61 |

* Amounts shown represent civilian population, estimated income of civilian population, and estimated civilian expenditures.

Population data for the period 1936 through 1947 are based upon United States Census Bureau estimates. Estimates for December 31, 1948 and 1949, prepared by the Department of Finance, are tentative and subject to minor revision.

Amounts of income received by individuals in California, 1936 through 1947, are based on estimates prepared by the Office of Business Economics, United States Department of Commerce. Data for 1948 and 1949 are estimates by the State Department of Finance.

Data on consumer expenditures are estimates by the State Department of Finance based upon total income less federal and state personal income taxes, modified by estimated annual changes in volume of liquid assets held by individuals and changes in short-term consumer credit outstanding.

¹ These bonds have never been presented for payment and are barred by the Statute of Limitations; however, the Legislature has appropriated money to pay all such bonds presented to date.

² Chapter 611, Statutes of 1943, and Chapter 1492, Statutes of 1945, appropriated \$26,239,738.75 to the Bond Sinking Fund of 1943 for the purpose of paying the principal and interest on these issues to final maturity.

³ In addition there is \$34,678.02 in the Olympic Bond Fund and \$5,230,055.28 in the Bond Sinking Fund of 1943 which is available for payment of interest.

⁴ In addition there is \$442,160.20 in the Seawall Sinking Funds and \$6,706.64 in the India Basin Sinking Fund of 1909 which is available for payment of interest.

⁵ Callable on or after January 2, 1951, in the amount available in the sinking fund.

⁶ Callable on or after January 2, 1955, in the amount available in the sinking fund.

⁷ \$500,000 callable on or after March 1, 1971.

⁸ Callable on or after January 2, 1941, in the amount available in the sinking fund.

Salaries and Wages

Position Titles

In the detailed departmental and agency budgets, positions included in the state civil service have been set forth under the official class titles established therefor by the Personnel Board. Positions exempt from civil service have been listed by their departmental titles, as set forth on the official roster of employees maintained by the Personnel Board.

Positions Now Authorized

In general, the positions included under this heading are those which were established as of July 1, 1948, together with those for which funds were provided in the 1948-49 fiscal year budget or otherwise authorized as of that date and authorized revisions thereof. Amounts shown for positions now authorized represent actual salary payments for 1947-48 and estimated salary payments during 1948-49 and 1949-50, assuming full year employment, unless the position is estimated to be established materially later than July 1, 1948. In such cases only the cost from date of establishment is shown.

Proposed New Positions

Proposed positions for the budget year which have not yet been established or authorized have been listed under this heading, as well as anticipated upward reclassifications of positions. Proposed increases in time of part-time positions are also listed under this heading, if the increase amounts to one-half time or more; otherwise the position is shown under "Positions Now Authorized" on the increased time basis.

Estimated Salary Savings

Unless indicated to the contrary by experience and anticipated conditions, a lump sum deduction is made from each group total of salaries and wages in anticipation of savings which are certain to accrue because of temporarily vacant positions, and the lower entrance rates of salary at which replacement personnel are paid.

The amounts of such estimated savings may not correspond to the number of positions deducted because of adjustments to the latter for positions authorized to start after July 1. The amounts shown opposite such positions are for the estimated costs for the period of occupancy only and, therefore, there is no money savings to be anticipated.

Number of Positions

Filled positions in 1947-48 are counted to the nearest tenth of full-time and full-year employment, except for members of boards and commissions, temporary help, etc.

Authorized positions for 1948-49 and 1949-50 are counted to the nearest tenth of full time. Full-time positions authorized to start later than July 1st are counted as full positions, but the totals are adjusted for the unused time by a deduction under estimated salary savings.

Where more than one part-time position of the same class appears under a single function, the number of separate part-time positions is indicated opposite the word "Individuals." Such items and all other items enclosed in parenthesis in the number of positions columns are excluded from position totals.

Salary Range

Rates of pay listed under this heading represent salary ranges established by the State Personnel Board for civil service classifications, or fixed by the appointing authority and approved by the Director of Finance for each class of exempt position.

The amounts shown indicate (1) the minimum rate and (2) the maximum rate. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate paid for an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board on July 25, 1947, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than \$10. A table of salary ranges in the state civil service is included at the end of this section. Thus, \$220-268 indicates a monthly salary range having steps of \$220-\$231-\$243-\$255-\$268. Salary ranges for instructional positions in the state colleges are set forth in the detailed budget of the Department of Education.

Unless otherwise indicated the rates shown represent gross monthly salary without deduction for any maintenance which might be furnished the employee. The symbol "MSF" following the range indicates that the employee is furnished maintenance for self and family for which no deduction is made from the salary shown.

Schedule of Salary Ranges in the State Civil Service

| Range No. | Steps | | | | |
|-----------|-------|------|------|-----|------|
| 9 ----- | 140 | 150 | 160 | 170 | - |

Automatic Salary Adjustments

Subject to availability of funds, Section 18856 of the Government Code requires that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in which his service rating is equal to or above a reasonable minimum, which has been fixed by the Personnel Board as "Standard."

Provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions.

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the

agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty and responsibility of the work.
3. Cost of living and improvement of living standards.
4. Conditions of work in the class.
5. The general financial condition of the State and the fiscal policy established by the Legislature.

The rates of pay of a group of approximately one thousand laborers, workmen, and mechanics in the state service are established at the hourly wage rates negotiated with private contractors in the county in which they are employed. They receive all the collateral benefits, such as premium pay for night work and overtime received by employees in private industry and, in addition, they receive the added state benefits of vacation and sick leave with pay, plus 5 cents and 10 cents an hour increase after one and two years' employment with the State.

Inasmuch as the budgets were prepared in August and September, 1948, the salary ranges shown are, in general, those in effect on July 1, 1948, and salaries and wages expenditures for both 1948-49 and 1949-50 reflect rates of pay then in effect. Since that date the Personnel Board has established some new classes, and has revised the titles and salary ranges of others. Similar adjustments have been made in exempt classes. In order that the most current information on the salary ranges of state classes may be available, a list of all new classes, title changes and salary range changes adopted from July 1, 1948, through November 30, 1948, is set forth on page A-50. This list of civil service and exempt classes is arranged alphabetically and may be used to correct the titles and salary ranges of the classes as set forth in the agency budgets. Classes not included in this list may be assumed to be correct as of November 30, 1948.

Increases in rates of pay for additional classes retroactive to September 1, 1948, have been proposed by the State Personnel Board, contingent upon legislative enactment of a deficiency appropriation for the purpose.

Provision for the cost of salary increases already granted and those further proposed has been made for the budget as a whole on page 737 under the heading, "Provision for 1948-49 Salary Increases." In the case of General Fund agencies, the costs for the current year not already provided for in agency budgets will be met by allocation from the Salary Increase Fund provided by Item 362 of the Budget Act of 1948, including any augmentation thereof by deficiency appropriation. For special fund agencies, the required amounts for the current year will be made available by executive order of the Director of Finance out of the respective appropriations made by said Item 362 from each special fund from which salaries are paid.

The amounts for 1949-50 represent the total estimated added expenditures for the budget year resulting from the 1948-49 salary increases. Upon completion of legislative action on the deficiency appropriation for the further increases proposed by the State Personnel Board, the 1949-50 costs of the increases decided upon will be computed and amendments to the Budget Bill will be presented to eliminate the lump sum provision and to appropriately increase each agency's support appropriation.

List of Salary Range Adjustments, New Classifications, and Changes in Classification Titles Since July 1, 1948

(New classes are listed in italics. Changes in title and classes established in lieu of former classes are indicated by showing the new titles immediately under the title of the former classification. Member help classes at the Veterans Home are not shown. They received one-half the increases granted the corresponding civil service class.)

^b Neither federal aid revenues, nor the expenditures therefrom, are included in the over-all budget totals. See Schedule VIII for summary of Federal aid revenues and expenditures.

^c These state appropriations and federal grants are deposited in the Vocational Education Fund, from which expenditures are made.

^d Does not include reimbursements to school districts maintaining approved vocational instruction. See Local Assistance Budget.

^a Includes expenditures for treatment heretofore provided on a contract basis by the University of California Diagnostic and Treatment Center.

^A A residential school for the education and medical treatment of children afflicted with cerebral palsy, temporarily located at Redwood City. In conjunction with the school there is also maintained by the University of California, at its School of Medicine in San Francisco, a Diagnostic and Treatment Center, which provides diagnoses, medical direction and treatment for children referred to it by their local communities, as well as for those in the residential school.

a This budget covers the period July 1, to September 30, 1949 only. By provisions of Section 4882 of the Education Code the Commission on School Districts expires October 1, 1949, and its powers and duties are transferred to the State Board of Education. See budget of Department of Education for proposed expenditures for this function after September 30, 1949.

a Expenses of this function are met from charges to other agencies for accounting services.

c In accordance with the provisions of Sections 13163, 13164, and 13165 of the Government Code, all expenditures of the Buildings and Grounds Division are paid from the Service Revolving Fund. Collections from special agencies for janitor and maintenance service, and from agencies requesting other special services, are deposited in the Service Revolving Fund. After the cost of services rendered and charged to other agencies has been deducted, the remaining expenditures are charged to the support appropriation of the Buildings and Grounds Division. The "Net Totals, Support" represent such remaining expenditures.

d Supported from income appropriated by Chapter 18, Statutes of 1944 (Fourth Extra Session). No further appropriation required.

| 78 | a Amount estimated for 1949-50 is based on elimination of temporary 15% tax credit on tax liability accruing after January 1, 1950 in accordance with provisions of Chapter 12, Statutes of 1948. | | | | |
| 79 | b Amount estimated for 1949-50 is based on elimination of the temporary rates, personal exemptions, and credits against net income on tax liability accruing after January 1, 1950 in accordance with provisions of Chapter 12, Statutes of 1948. | | | | |
| 80 | These provisions reduce personal exemptions from \$3,000 (single) and \$4,500 (married or head of family), to \$2,000 and \$3,500, respectively. Credit against net income, in the case of an estate is reduced from \$1,500 to \$1,000. Tax rate on net income between \$5,000 and \$30,000 is increased 1 percent. | | | | |

| 69 | ^a Effective date of Chapter 16, Statutes of 1947, First Extra Session, which separated the California Highway Patrol from the Department of Motor Vehicles. | | | | | | | | |
| 70 | ^b Through error the Budget Act of 1948 appropriation for the support of the California Highway Patrol was made payable from the General Fund rather than from the Motor Vehicle Fund. The General Fund money has not been spent and will be allowed to revert. Under authority of Section 19 of the Budget Act, \$3,500,000 was transferred from the support appropriation of the Department of Motor Vehicles to support the Highway Patrol pending convening the 1949 Legislature. Special legislation will be requested in the 1949 Session to appropriate the necessary funds from the Motor Vehicle Fund for the support of the Highway Patrol and to repay \$3,500,000 to the Department of Motor Vehicles. | | | | | | | | |
